UltraWide30 Display

The 12 inch diameter PowerSphere is constructed of optical grade plastic that can glow with a variety of coloured under-lighting from the base. The unit houses only the processor, mother board, video card(s), memory and hard disks. All IO functions are now based in the PowerDoc.

PowerSphere

The PowerDoc

The Power Keyboard now becomes your ultimate IO station. Holding 2 slot loading optical drives, Firewire 400/800 ports, USB and USB2 ports as well as wireless optical mouse capability for both right and left hand users. Optional telephony module allows for headset use for corporate and residential telephone systems using iCall software that integrates directly into your address book.

Return of the King.
